

NFTsky

Pitch deck

Mission

Empower creators, collectors, investors and traders to achieve peak performance in the **NFT market**

AI-based solutions and advanced trading tools offer users a seamless and intuitive approach to NFT portfolio management

Dynamic re-balancing and AI-powered trading suggestions for 24/7.

NFT Market: Booming Accessibility, Expansive Growth

The revenue in the NFT market has nearly doubled in 2023, and is expected to continue growing at a 18.55% CAGR to reach \$3.16 billion by 2027.

NFTs in the Real World: Expanding into Various Industries

From real estate deals and security certificates to ticketing solutions, carbon offsetting and even charitable endeavors, NFTs are revolutionizing traditional industries.

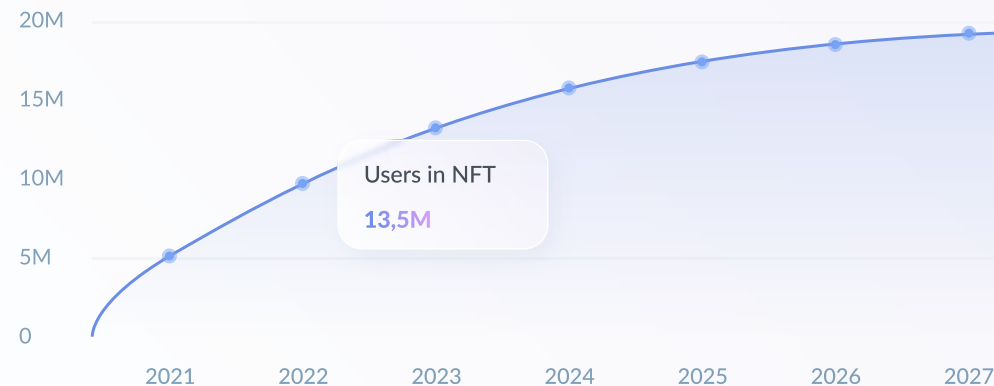

Only 4% of the US population owns NFTs

The number of users has increased by 150% over the past three years, with the user penetration rate growth of 50%.

USERS

AVERAGE REVENUE PER USER

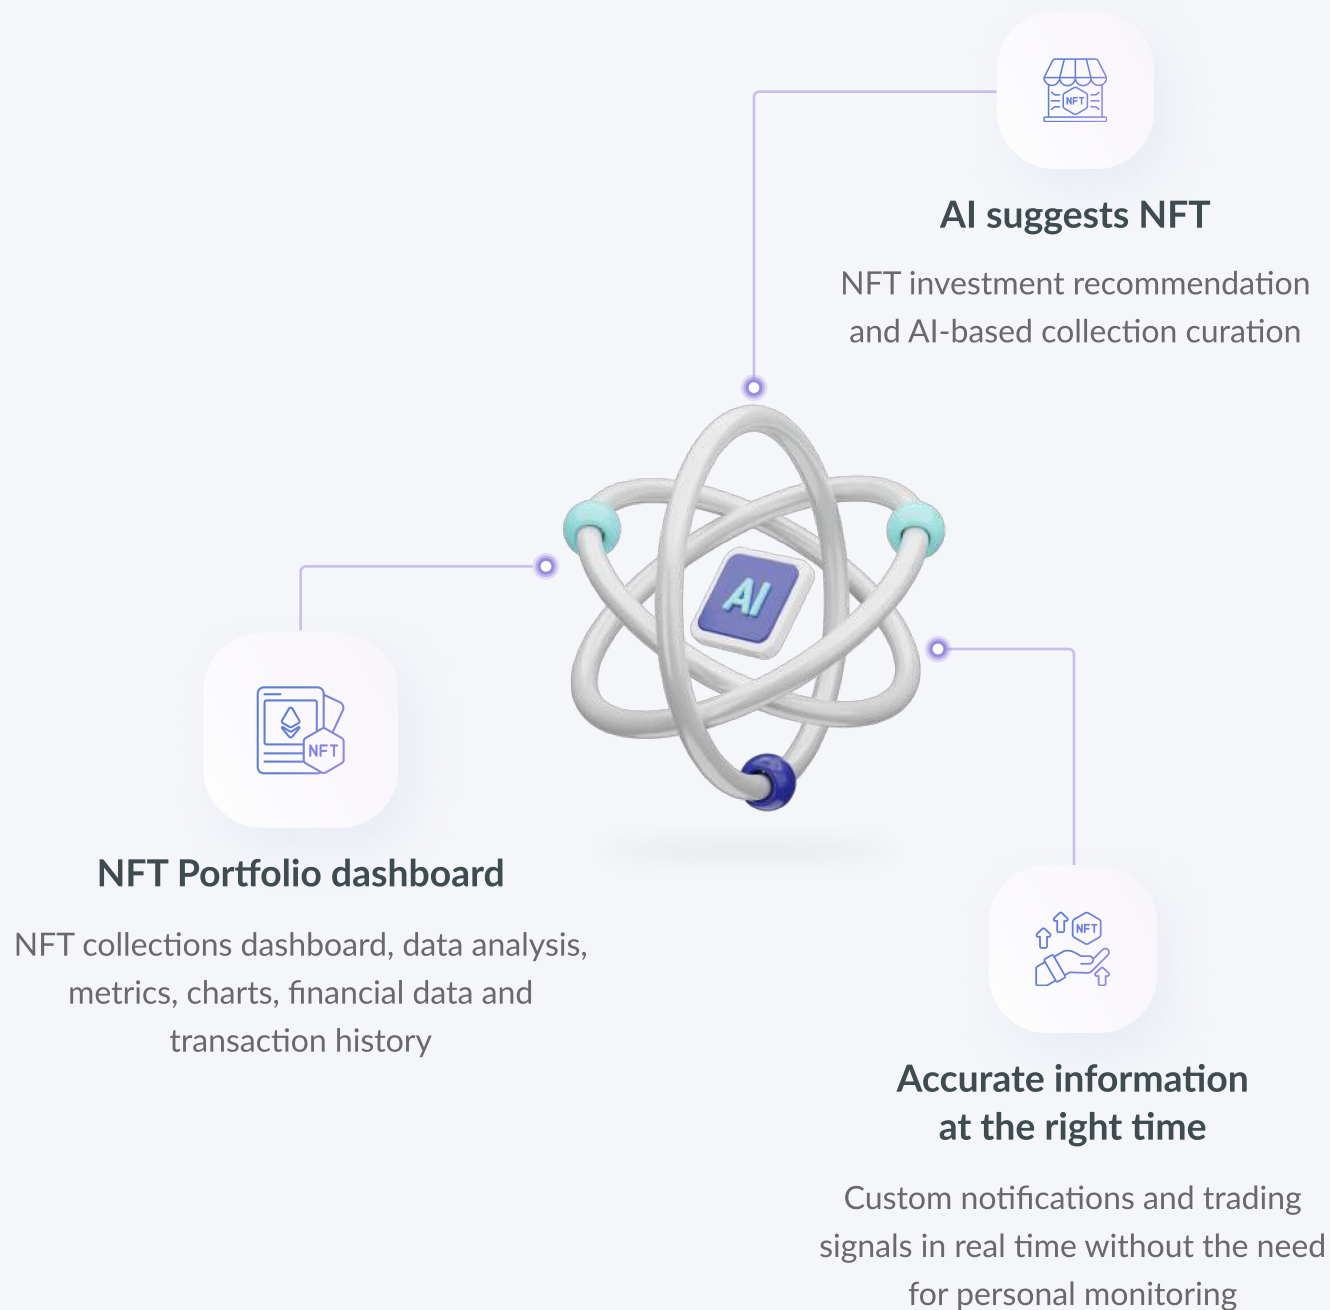

One-click **AI-powered** NFT portfolio management

Maximize profit / minimize risk, get market data instantly and use NFTs as assets with AI

How it works

- 1 The user indicates the preferences for the NFT portfolio parameters like the quantity, ROI and risk, cryptocurrency.
- 2 AI analyzes NFT marketplaces and provides a tailored-made portfolio suggestion available for the client to purchase.
- 3 The client has the flexibility to buy individual suggested NFTs, or one-click buy the entire portfolio.
- 4 The client saves hours of research time, while receiving a well-balanced personalized portfolio of NFTs.

Get more and **sell faster** with AI-based **FNFTs**

AI fractionalizes NFTs to provide an opportunity to buy a piece of a popular NFT unavailable before.

How it works

- 1 The NFT holder provides the collection for AI to evaluate.
- 2 AI analyzes the NFT collection based on the key parameters.
- 3 The fNFT initiator receives a recommendation about the possible price of the NFT and the number of shares to split.
- 4 The client confirms the parameters proposed by the AI and issues the fNFT.
- 5 NFT shares become available for purchase and automatically get listed within the marketplace.

AI-based NFT valuation

The AI algorithm provides a detailed price recommendation for the NFT creator, who can opt-in for lazy minting, essentially making it a pay-as-you-earn model.

AI-based NFT fractionalization

AI NFT fractionalization allows investors to buy a piece of a high-value NFT, reducing their risk and diversifying their portfolio.

Marketplace with high liquidity

Selling fractions of NFTs can help owners sell their assets faster and for a higher price.

AI-powered trading tools: More profit, less risk

An AI order selects the best time, price to buy an NFT, to fix profit or loss per to the trading strategy and market data from multiple marketplaces.

How it works

- 1 A trader selects the position opening parameters for the NFT based on their strategy.
- 2 The trader specifies the position parameters T/P and S/L .
- 3 When the price reaches a specified threshold, the system puts the NFT up for purchase/sale.
- 4 When the order is executed, the trader fixes the profit.
- 5 Auto-convert & auto-withdrawal tools allow to collect the proceedings of NFT sales in a specified currency and wallet.

High-tech AI trading tools on the NFT market

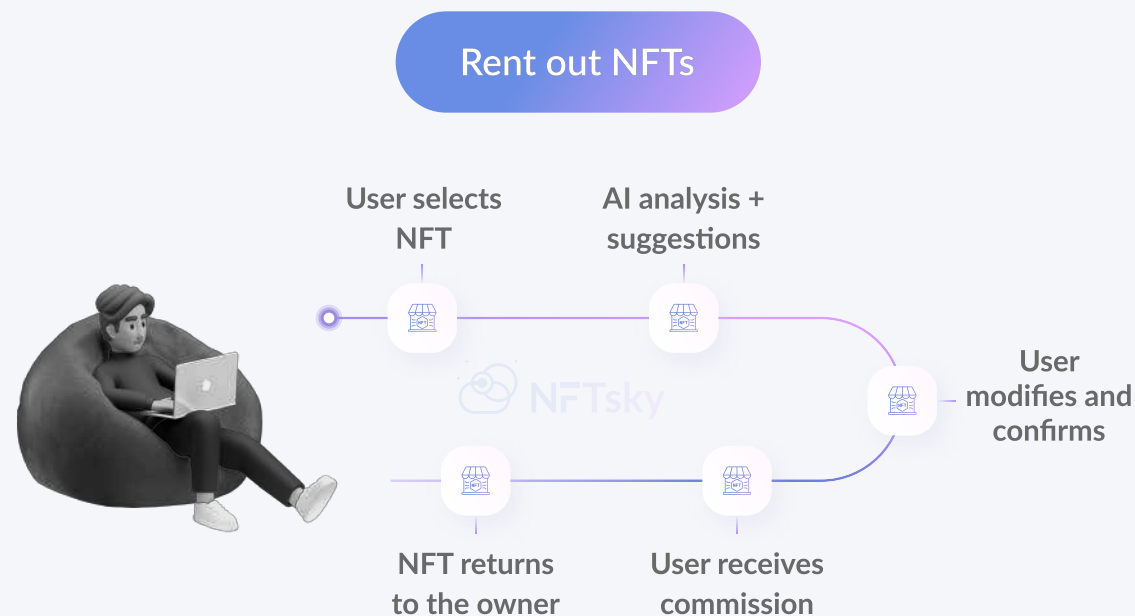

Automated NFT trading system tracks the market dynamics and executes the strategies based on the selected preferences and market, limit and pending orders.

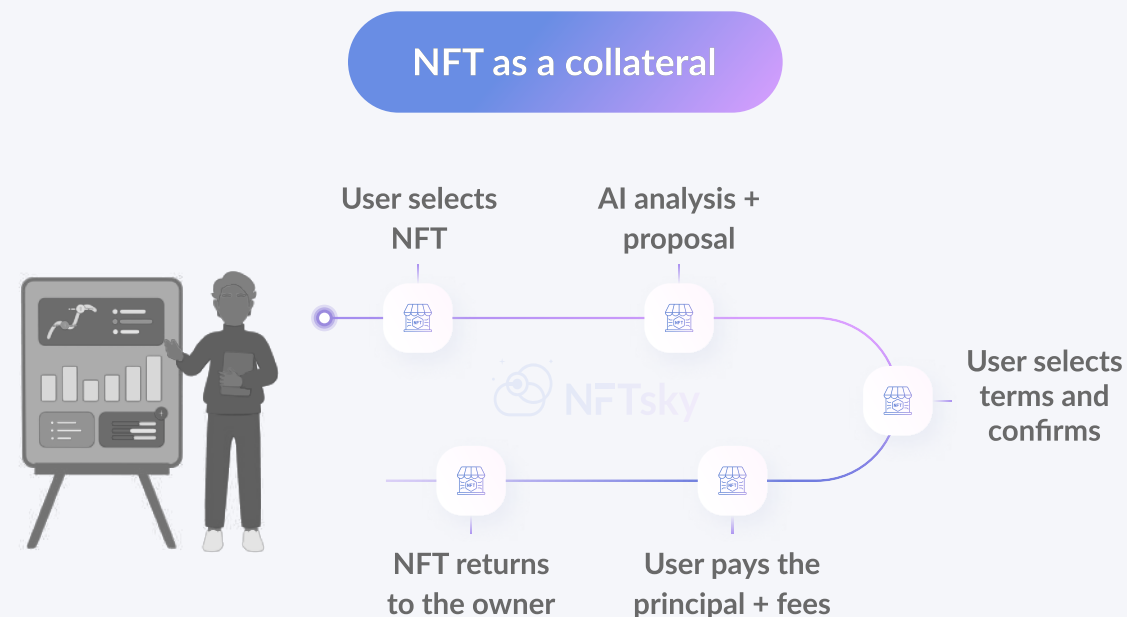

Professional trading tools

NFT futures and options allow to earn on the lucrative price fluctuations without the need for large sums of money and actually holding those assets.

Financial flexibility: **rent out or borrow** against your NFTs

AI analyzes a wide range of data factors to assess the value of an NFT, including its rarity, popularity, and historical sales data.

The AI model calculates the maximum loan amount and the best terms that can be issued to the borrower.

Roadmap

2024

Q1

- AI recommends NFTs to the portfolio
- API data aggregation and database upload from marketplaces
- Lazy mint
- Buy NFT for SKY token with discount
- Pay comission in SKY token
- STARKNET support

Q2

- P&L for deal and portfolio
- Dashboard, metrics, infographics
- Operations history for NFT portfolio
- SKY token locking for advanced features
- AI-based NFT valuation
- ETH support

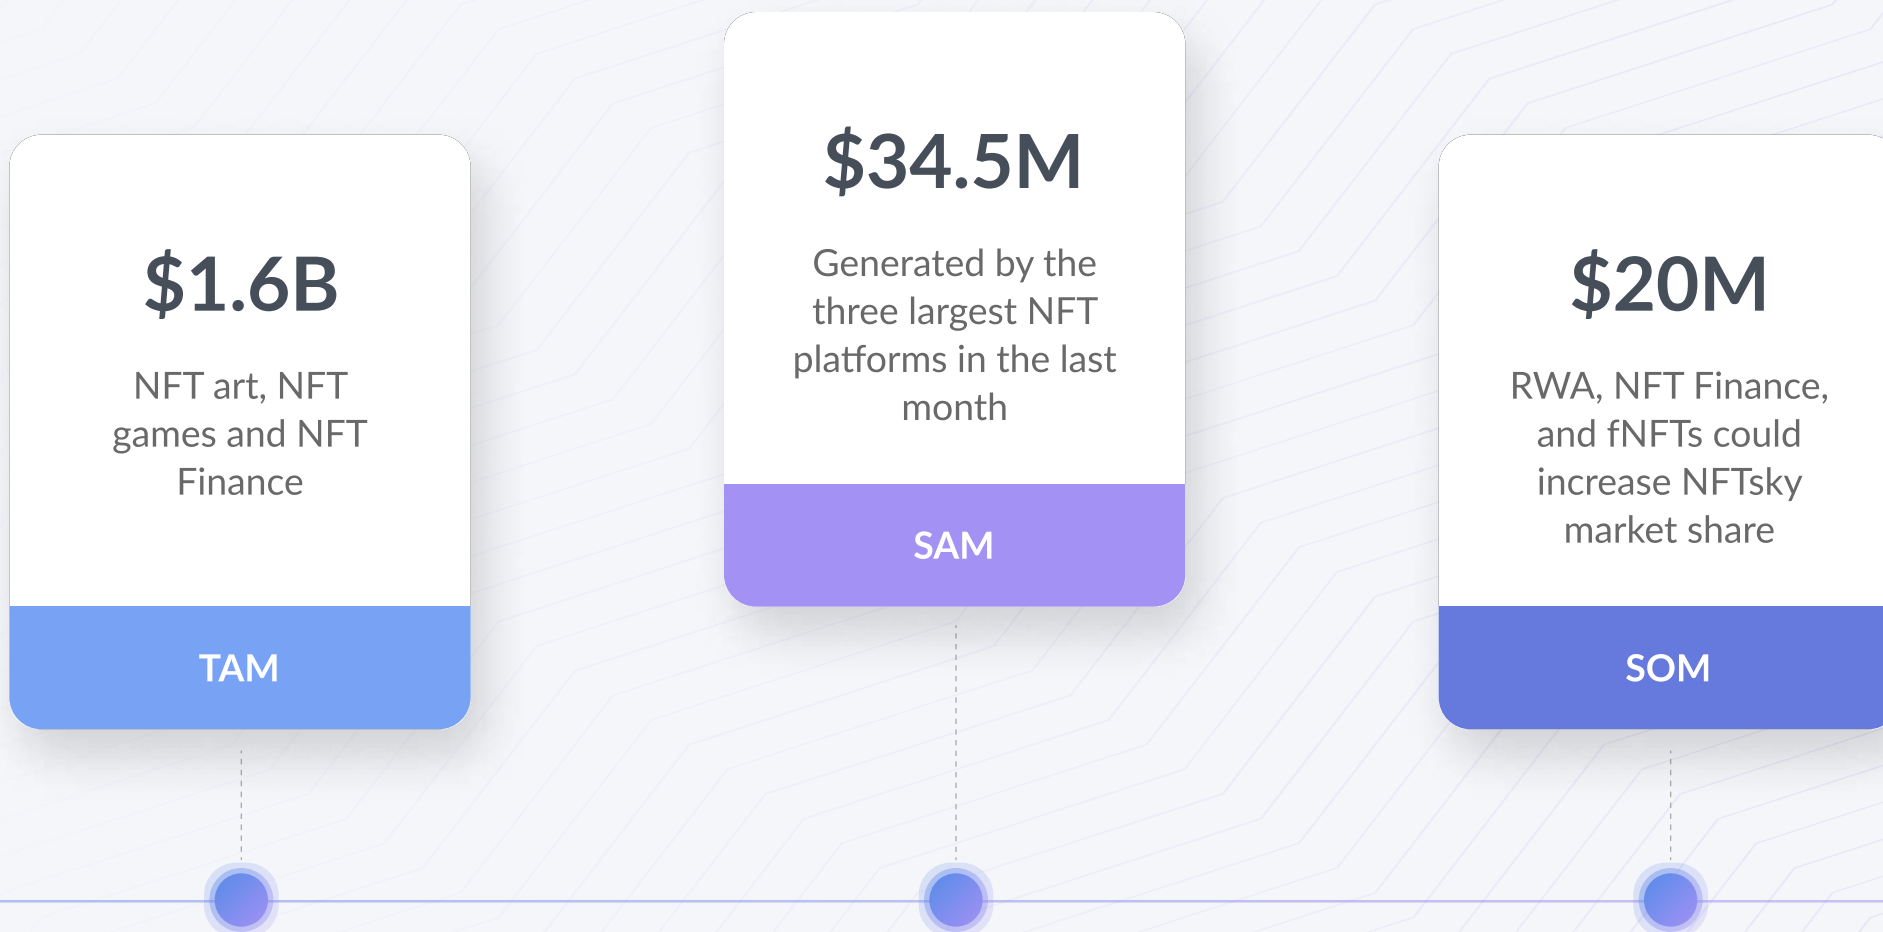

Q3

- AI based signals and notifications
- AI based NFT fractionalization
- API for NFT price valuation provided by AI
- Pay for subscription in SKY token
- BSC support
- Polygon support

Q4

- NFT rental
- AI smart-orders for TP/SL, limit, pending
- API
- NFT loans
- NFT futures
- API for futures trading

NFTSky - Future of the NFT market

One-click AI-powered NFT portfolio management

AI-powered algorithm automatically tracks the value of your NFTs, so you can stay up-to-date on their performance. The system also provides suggestions for rebalancing and trading, in accordance with the preferences specified.

AI-powered trading tools: More profit, less risk

Our AI-powered system aggregates the data from numerous marketplaces in real time, so you can always choose the best trading conditions. The AI also provides its own suggestions and market insights.

Tokenize Anything with fNFTs

fNFTs are a great way of increasing liquidity and profitability of your portfolio. Whether it is tokenization of real estate or an exclusive artwork, fNFTs allow to sell shares of the asset to multiple investors.

At NFTSky we are excited about NFT technology and aim to create a new paradigm of digital assets trading
