TOKENOMICS

The platform will issue and distribute a SKY token that will be used for all payments on the platform, including the purchase, sale and auctions of NFT, advertising and other payments.

The creators of the platform will hold exclusive events for token holders, such as NFT auctions or offers at discounted prices for certain NFTs.

Token holders will receive bonuses and rewards from the platform for using the SKY token, as well as for participating in exclusive events.

NFTsky will keep a certain number of tokens as a reserve, which can be used for the development of the platform and investment in new projects.

To increase the value of the token, NFTsky can increase the number of special functions that can only be available to token holders.

NFTsky will encourage token holders to long-term token storage by providing privileges such as priority access to exclusive events.

The platform will maintain the liquidity of the token, ensuring its trading on cryptocurrency exchanges.

Token Distribution
